

Wood-Frame Exhibit Panels

Materials and Plans

Good luck constructing your National History Day exhibit! Here are some things to keep in mind as you start this project.

- **This design is just one example of how to construct an exhibit. There are no “correct” designs or “required” materials outlined in the History Day rules.**
- **Use your own creativity and academic judgment to develop the best design for your exhibit.**
- **The cost estimates in the “Exhibits Made Easy” DVD are approximate. Your costs may be higher or lower depending on the availability of materials in your community.**
- **This is a student project. You should have training and supervision when using power tools or cutting tools, but students are required to do all design, preparation and assembly of their exhibits.**

Sample Materials List

	5 foot x 2 foot frame	4 foot x 2 foot frame	40 inch x 1 foot title panel
1” x 2” x 8 foot Wood Strips	7	6	2

Metal Braces: 12 3” ‘L’ Braces
6 3” ‘T’ Braces
